

WHO WE ARE

The Methacton Education Foundation is independent 501(c)(3) nonprofit that raises funds for innovative educational programs in Methacton that exceed the district's budget.

The paradigm of public school funding has shifted. Public schools can no longer solely rely on traditional funding sources such as taxes or government aid.

In order to survive this shift, we must work together with philanthropic **individuals, corporations, and institutions** to provide the Methacton School District with resources needed to succeed.

Driver's Education Simulator

“

"The Methacton Education Foundation has always provided teachers and administrators with the funds to implement activities, opportunities, and technologies for ALL Arcola students. Without the support of the Foundation in recent years, many of these simply just would not have been available to our students. The Foundation helps take Methacton from a good place to learn to a great place to learn."

”

-Adam Chantry
Arcola Planetarium Director

“

"Teachers appreciate all the hard work the Foundation has done for us. We get to see our innovative ideas and provide experiences in STEM education for Methacton students. The Foundation has provided teachers with learning opportunities that we can directly use with improving our instruction and share with our colleagues."
